Request for Proposals (RFP)

Building Plans and Renovations for Arlington Station 4

Issued By: Arlington Fire District

RFP Number: 2026-01

Issue Date: 06/01/2026

Proposal Due Date: 10/05/2026

Point of Contact: Battalion Chief William Tompkins

Introduction

Arlington Fire District is soliciting proposals from qualified architectural, engineering, and construction firms to provide professional services for the planning, design, renovation, and potential expansion of Arlington Station 4.

The selected firm or team will assist with evaluation of the existing facility, development of renovation plans, preparation of construction documents, permitting support, cost estimating, and construction administration services.

The goal of this project is to modernize Arlington Station 4 to improve operational efficiency, safety, code compliance, accessibility, energy performance, and long-term functionality.

Project Background

Arlington Station 4 currently operates as a full-time career fire station. The facility requires renovations and upgrades to address aging infrastructure, operational limitations, compliance requirements, and evolving service needs.

The Fire District anticipates that the project may include:

- Renovation and/or addition of firefighter bunk rooms
- Creation or modernization of a day room or lounge area
- Reconfiguration of interior spaces to support living quarters and personnel needs
- Interior renovations
- Exterior improvements(That are needed to support interior renovations)
- Structural upgrades(That are needed to support interior renovations)
- Mechanical, electrical, and plumbing (MEP) system improvements
- ADA accessibility improvements
- Energy-efficiency upgrades
- ~~Apparatus bay modifications~~
- Administrative and personnel space upgrades
- Site and parking improvements(That are needed to support interior renovations)

- Technology and communication improvements
- Life safety and security system enhancements

The selected consultant(s) or team will collaborate closely with the Arlington Fire District throughout all phases of the project. Additional considerations may include maximizing the functionality of the existing footprint while integrating modern living quarters and support areas for career staffing.

Project Objectives

The primary objectives of the project include:

- Extending the useful life of Arlington Station 4
- Improving safety and operational efficiency
- Ensuring compliance with applicable codes and regulations
- Enhancing functionality for staff and public users
- Improving sustainability and energy performance
- Minimizing operational disruptions during renovation activities
- Delivering a cost-effective and maintainable facility

Scope of Services

The selected firm or team shall provide all necessary professional services required to complete the project, including but not limited to the following:

Existing Conditions Assessment

- Conduct site visits and facility evaluations
- Review existing drawings and documentation
- Identify deficiencies and operational constraints
- Evaluate structural, architectural, civil, MEP, and life safety systems
- Meet with District representatives and stakeholders
- Prepare an assessment findings and recommendations report

Programming and Conceptual Design

- Develop space programming requirements
- Prepare conceptual design alternatives
- Provide preliminary construction cost estimates
- Develop proposed schedules and project phasing recommendations

Design Development and Construction Documents

- Prepare schematic design documents
- Develop design development drawings
- Prepare complete construction documents and technical specifications
- Ensure compliance with local, state, and federal requirements
- Prepare permit submission documents

Bidding and Procurement Support

- Assist with preparation of bid packages
- Respond to contractor questions and RFIs
- Provide recommendations for contract award

Construction Administration

- Attend construction meetings
- Review submittals and shop drawings
- Respond to RFIs during construction
- Conduct periodic site observations
- Review change order requests
- Assist with punch list development and project closeout

Deliverables

The selected firm or team shall provide the following deliverables at a minimum:

- Existing conditions assessment report
- Programming report
- Conceptual design options
- Schematic design package
- Design development package
- Construction documents
- Technical specifications
- Construction cost estimates at each phase
- Project schedule
- Permit application support documents
- Final record drawings, if applicable

Electronic and hard-copy formats shall be provided unless otherwise approved by the Fire District.
